

**Experts in Compounding Custom Colors for Plastics for Over 20 Years**

### **OPTICAL GRADE POLYCARBONATE LENS MATERIAL**

Custom colors formulated to support a wide variety of polycarbonate lens applications in tinted colors and specialty vision enhancing dyes

OptiColor has been one of the leading compounders of clear and tinted optical grade PC for over 20 years to some of the worlds largest eyewear brands, military lens and frame molders, and safety lens/shield producers.

We work with all major PC resin grades and material is custom compounded in the USA at our Huntington Beach, CA production facility.

- NO black specs
- NO contamination
- Consistent quality with every order
- Material is custom compounded in dedicated optical grade clean rooms that only run OQ grade PC
- Temperature and humidity HVAC controlled
- Visual spectrum wavelength filtering
- Custom UV cutoff
- Visual spectrum laser dyes
